

Sovereign capability used to mean giving up modern AI.

Not anymore.

Competitive Gap Widens

Rivals using AI move faster while you wait for security approval that never comes.

Institutional Knowledge Evaporates

Every expert who retires takes decades of expertise. Your edge walks out the door.

Regulatory Exposure Compounds

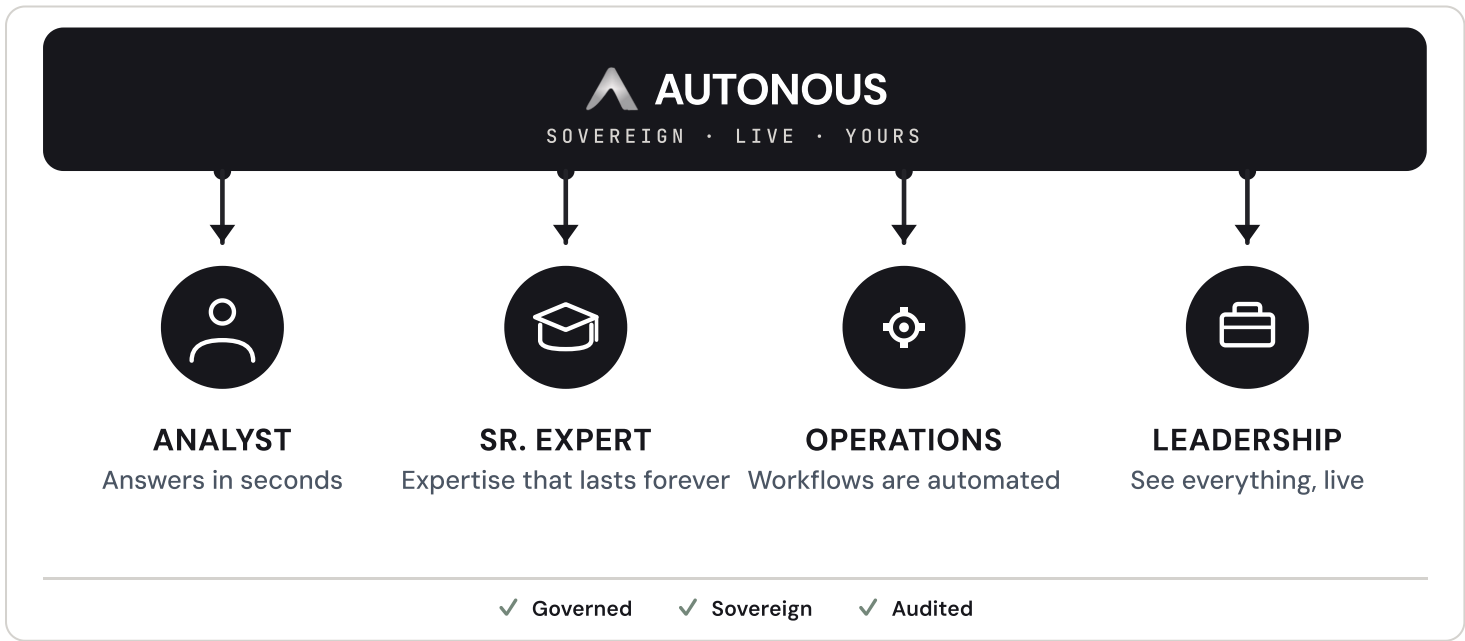

Every ungoverned AI tool touching regulated data creates audit risk with every query.

The biggest barrier to enterprise AI adoption isn't technology — it's trust. Organizations in regulated industries need AI that operates within their security, governance, and compliance boundaries.

A new category of AI platform exists—one that doesn't ask you to choose between power and control. **Sovereign AI runs inside your infrastructure**, learns from your data without it ever leaving, and every action is **governed, audited, and human-approved**.

Your AI. Your Infrastructure. Your Control.

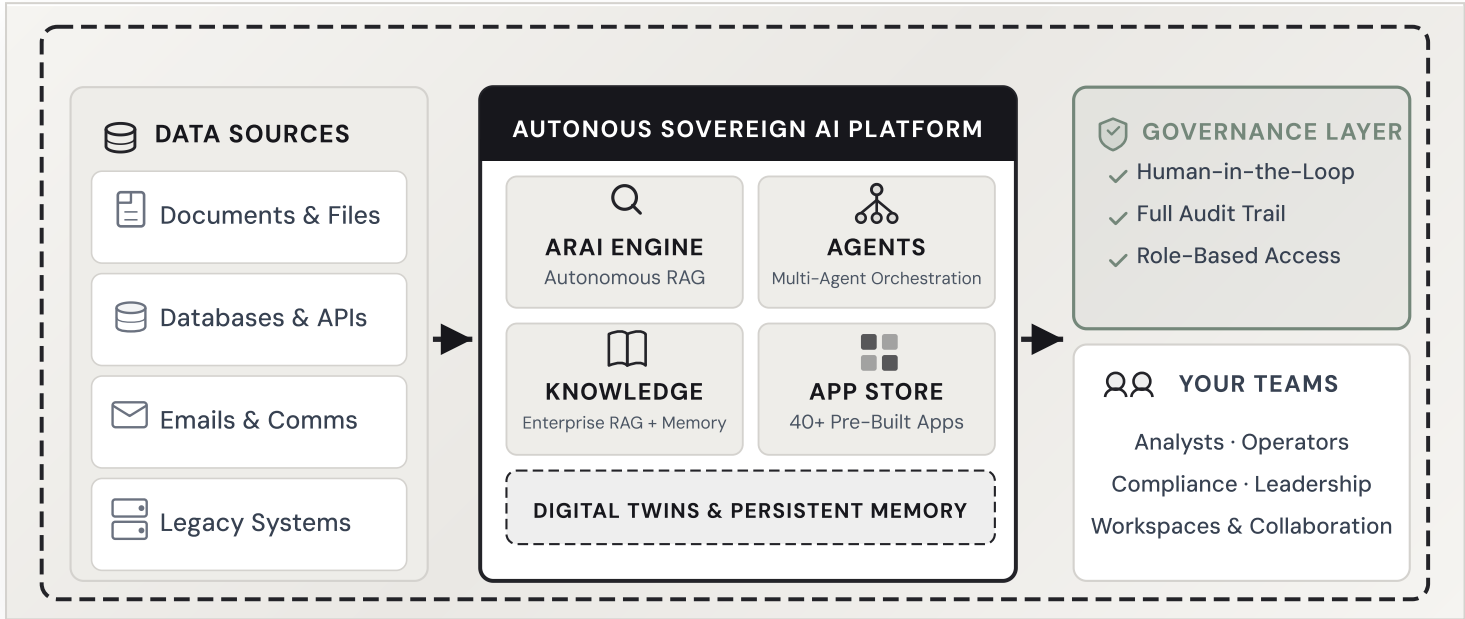

The sovereign AI platform that deploys inside your walls, learns from your data, and answers only to you.

One Platform. Every Role. Transformed.

Sovereign by design. Powerful by default.

HOW AUTONOMOUS OPERATES INSIDE YOUR INFRASTRUCTURE

PLATFORM CAPABILITIES

AI Teams Fire-and-forget super agents. Give one instruction—AI auto-creates teams, assigns agents, delivers complete output.	Autonomous AI Agents Agents that plan multi-step tasks, execute across your systems, and learn from every interaction with human oversight.	Digital Twins & Memory Persistent AI replicas of senior experts. Institutional knowledge available to every team, 24/7, forever.	Enterprise Knowledge Every response grounded in your documents with full source attribution. No hallucination.
Intelligent Workflows Automated processes that adapt when conditions change. Full context across every step.	AI Workspaces Collaborative spaces where teams and AI agents work side by side with shared context and oversight.	Enterprise App Store 40+ pre-built apps ready to deploy across departments. Build custom apps in days.	Multi-Layered Security Every request passes through multiple security layers. Full audit trail. Complete chain of custody.

WHAT OUR CUSTOMERS EXPERIENCE

“AUTONOMOUS transformed our intelligence analysis capabilities. What once took our analysts days now happens in minutes—with complete audit trails for chain of custody.”

— Director of Intelligence, State Police Agency *

On-Premises Full physical control	Private Cloud Your VPC, your keys	Air-Gapped Zero network exposure
